

SECTION 1: IDENTIFICATION

Product name: 316 Stainless Steel Welding Rod

Manufacturer: Precision Alloys Inc, Cleveland, OH

SECTION 2: HAZARDS IDENTIFICATION

Signal word: WARNING

Hazard statements: H350i May cause cancer by inhalation (welding fume). H372 Causes damage to organs through prolonged or repeated exposure.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Name	CAS No.	Concentration (%)
Iron	7439-89-6	60-70
Chromium	7440-47-3	16-18
Nickel	7440-02-0	10-14
Manganese	7439-96-5	1-2

SECTION 4: FIRST-AID MEASURES

Inhalation of fumes: Remove to fresh air. Welding fume exposure may aggravate occupational asthma.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Solid metal rod Odor: None Melting point: 1375-1400 C

Flash point: Not applicable (solid metal)

Solubility: Insoluble in water

SECTION 11: TOXICOLOGICAL INFORMATION

Carcinogenicity: Nickel and chromium compounds in welding fume are classified as carcinogenic (IARC Group 1).

Sensitization: Nickel is a known skin sensitizer; may cause allergic contact dermatitis.

SECTION 16: OTHER INFORMATION

Revision date: 2026-03-01
